Subject: Happy Hump Day! Atropine, Acetylcyst 20%, CYTARABINE and Highest Selling Weekly Products

Good morning

I hope everyone is having a good stress free week! The American Regent plant shut down is still affecting most of you and we are working to help you find all of your "Hard to Find" products. This has been a busy week at PRN and there are numerous shortages and updates over the last day or so. I can still access a good portion of what is short in the market so please don't hesitate to ask!

I've listed the newest shorts and latest updates on the ASHP site for your review. I've also included a short list of the products I have access to this morning. It's a long email but I hope this is helpful to you.

As always, if there is a product that you need that is not listed please contact me, and I will find it for you!

Thanks,

[REDACTED]

Subject: American Regent - Affected products

Hello

I have put together a more accurate list of all the products affected by the Shirley NY plant being shut down (pasted under my signature). Thanks to all my clients who helped me put this together.

Our pricing and availability has been all over the place as you can imagine. Please take a look and give me a call or email with what you feel you may need me to look into.

I will of course supply you with the best pricing I can find. I hope this helps.

Also, I've got #44 Sodium Acetate 2mEq/mL, 50 mL vial (NDC 00409-3299-06) @\$245.
