None.

20. Given the current mission, major programs, and major operational objectives of the department/agency to which you have been nominated, what in your background or employment experience do you believe affirmatively qualifies you for appointment to the position for which you have been nominated, and why do you wish to serve in that position?

The current mission of the Airports Authority is to provide world-class facilities and services to the traveling public in the National Capital Region (airports, Dulles Toll Road and construction of Metro Silver Line). This requires keeping airport costs competitive for airlines -- which have a choice of airports to serve with various schedules, destinations, and connections -- to meet the needs of the region's business and economic interests.

Because of a high debt load and past pressure to move flights from Dulles to the closer-in (but smaller) Reagan National, Dulles was in serious financial trouble in 2014. This caused spiraling costs at Dulles, which was driving away even more airline business, along with serious overcrowding issues at Reagan National. In response, MWAA worked, and will need to continue to work, to control costs, boost non-airline revenue, refinance debt and keep new regulatory and congressional action from allowing even more flights to shift away from Dulles to DCA. As a result, Dulles traffic was growing again until COVID hit.

A primary responsibility of the board is to support the work of MWAA that brought the airports back into balance and to prevent these financial and operational problems from recurring. I have been the President of the Board of Los Angeles World Airports ("LAWA"), which oversees LAX and Van Nuys general aviation airport, since 2013. At LAWA, we have dealt with many of the same issues -- controlling costs, boosting revenue and managing our balance sheet debt. Moreover, we have worked to find innovative solutions to many of our most pressing problems especially in the use of technology. Finally, we have implemented the largest airport modernization in the country. I hope to be able to bring this experience to bear at MWAA along with a fresh perspective on how to take advantage of the opportunities that exist.

21. What do you believe are your responsibilities, if confirmed, to ensure that the department/agency has proper management and accounting controls, and what experience do you have in managing a large organization?

Because the board oversees and sets management policies in this area, a key responsibility is to ensure that the airports remain cost-competitive for airlines and the other on-site businesses that serve airport passengers. This is a key fiduciary responsibility for MWAA board members, particularly in light of the growing competition among U.S. airports. Also, in my capacity as President of LAWA, I have participated in the oversight of our CEO, who reports directly to the Board. We have implemented best practices and strong accounting controls, and I would also bring that experience to MWAA.

22. What do you believe to be the top three challenges facing the department/agency, and why?

(1) Preserving the DCA perimeter and slot rules – MWAA operates a two-airport system “as a unit” under its enabling legislation. This means the two airports must be kept in balance, according to their size and capabilities. I understand maintaining this balance is important for maintaining and growing the region’s international air service, which is based at Dulles because of its much larger terminal and runway capacity. Moving domestic destinations away from Dulles to DCA may prompt international carriers seeking domestic connections to move flights to other airports, usually in other regions. I recognize this can impact business at MWAA’s airports and the National Capital Region’s economy and its international travel options.

(2) Driving new non aeronautical revenue and controlling costs at airports – MWAA should be creative and innovative in driving new non aeronautical revenue at both Dulles and Reagan. In addition, to keep current levels of air service and grow service for the Washington region, MWAA’s airports must be cost-competitive for airlines. For MWAA and its board, this responsibility includes controlling expenses, careful investment and aggressively managing debt.

(3) Ensuring a safe, secure, predictable, economical, convenient and pleasant passenger experience – To give the National Capital Region the air service it needs and deserves, MWAA’s airports must offer top-quality services and customer experiences. A large factor is security, because of the large number of security concerns in and around the nation’s capital. This gives MWAA far greater security responsibilities and higher costs than most other airports, which is a factor in

MWAA's cost structure. This means MWAA's top concerns must include security issues, its cost of operations and its focus on customer service.
